## WORK EXPERIENCE

**Tata Consultancy Services** ( IT Analyst )

May 2023- till date

**Project Title:** Citi Bank

### Description:

Citi Private Bank is helping dynamic individuals and their families preserve and grow their wealth. Citi clients include leading entrepreneurs, executives, investors and their family offices. They provide customized private banking that crosses borders, including some sophisticated services usually reserved for major global institutions.

### Role & Responsibilities:

- Developed and maintained automated test scripts using Selenium and Java.
- Implemented BDD Cucumber frameworks and executed tests using JUnit.
- Managed test cases and execution in Zephyr, including test planning and reporting in JIRA.
- Collaborated with developers and QA teams to log defects in JIRA, track issue resolution, and improve overall software quality.

**Explo Infosystem India** ( Senior Software Tester )

Jun 2021- May 2023

**Project Title:** IS(Ideal spaces)

### Description:

Ideal Spaces is a powerful web-based interior design solution that provides customers with a cutting-edge portal to plan and purchase their next interior design project. It allows users to discover ideas, browse product catalogs, and create their designs at home, in-store, or on the go. It is designed for interior designers, enabling them to create designs for kitchens, bedrooms, and more. The application supports different user roles, such as designers, customers, and others.

### Role & Responsibilities:

- Executed Sanity, Smoke, and Regression testing.
- Developed automation scripts.
- Verified and reported bugs in QAT, Staging, and Production environments.
- Performed build deployments in QAT, Staging, and Production environments.
- Participated in Agile ceremonies and bug triage meetings.

**Aims Digital Pvt. Ltd.** ( QA Analyst )

Jun 2017- May 2021

**Project Title:** TSE

### Description:

A training institute. Provided corporate-level training for Fortune 100 companies. Created an online learning platform for professional employees and students. Employees and students took courses to improve job-related skills

### Role & Responsibilities:

- Executed Sanity, Smoke, and Regression testing.
- Verified and raised bugs on QAT/Staging/Prod.
